Preanalytical Best Practices Training

From BD Laboratory Consulting Services,SM **your partner** in obtaining preanalytical excellence through sustainable education & training solutions.

We realize the challenges you face every day that can affect your facility's bottom line. Preanalytical errors alone contribute to costs by impacting:

- **Quality of Patient Care** – erroneous medical diagnosis, and delayed results
- **Safety** – needlestick injuries to patients or staff
- **Time** – increased turnaround times and repeat sample collections
- **Resources and Budget** – staff and equipment
- **Reputation** – with patients and fellow colleagues

BD can help you identify the problem areas in your facility and show you how you can benefit from overall improvements gained in sample quality, workflow, turnaround time, patient safety and employee satisfaction.

Our **customized** training programs deliver the skills and knowledge your staff needs to reduce costly preanalytical errors and help you **achieve your critical organizational goals and objectives of...**

Elevating quality

Reducing costs

Improving productivity

What is the Preanalytical Best Practices Training Program?

BD understands that education is an essential tool to create improvements in the preanalytical phase. Preanalytical Best Practices Training is evidence-based training focused on the Clinical and Laboratory Standards Institute (CLSI) best practice procedures for blood collection, available to all healthcare practitioners who perform phlebotomy. The unique in-depth learning provided through this program will help drive sustainability of preanalytical best practices in your facility.

This interactive program is designed to provide superior outcomes from the preanalytical phase and help reduce healthcare costs. Objectives of the training are to:

- Provide superior patient care
- Provide high quality samples
- Reduce the incidence of redraws
- Provide a higher level of consistency in sample collections
- Develop a thorough understanding of the consequences of incorrect sample collection

How is the Best Practices Training Program delivered?

The one day Core Training Module entitled “*Principles of Quality & Safety Improvement for Specimen Collection*” is delivered live via a train-the-trainer format in your facility. Choose up to 12 staff members, **your new Preanalytical Specialists**, to attend.

- Offers comprehensive training for your selected Preanalytical Specialists
- Maximizes effectiveness in the training and education of your sample collection team
- Motivates your Preanalytical Specialists to champion the training with colleagues
- Provides an opportunity to make immediate improvements in key multi-functional departments such as: Lab, Nursing, Emergency, ICU, CCU, and Outpatient
- Easily implemented in a variety of sites within your hospital

Meet your partners — BD Trainers!

- Certified healthcare professionals MT(ASCP); RN, highly skilled in adult learning methodologies
- Conducts the train-the-trainer session in your facility
- Supplies the knowledge, tools and all inclusive package of training materials with the latest information and techniques available
- Provides on-going support to your Preanalytical Specialists
- Facilitates implementation planning to help ensure that optimum results and sustainability are reached in your facility

Preanalytical Best Practices Training Satellite Modules

10 comprehensive training modules are available to address the key issues necessary in conducting safe, effective, preanalytical procedures. These modules are designed for small group learning or self-study.

- Routine Venipuncture
- Capillary Blood Specimen Collection
- Vascular Access Devices
- Blood Culture Specimen Collection
- Patient Preparation
- Urine Specimen Collection
- Preanalytical Variables
- Anatomy & Physiology for Blood Specimen Collection
- Infection Prevention
- Equipment for Routine Venipuncture

Customized training modules can be developed and delivered to meet the unique needs of your organization. **Ask us how.**

Program Components

- Training Modules
- Training Binder
- Training Kit
- Continuing Education Certificate
- Name Badge

BD is an approved provider of continuing education programs in the clinical laboratory sciences by the ASCLS P.A.C.E.® Program, and your staff will earn continuous education credit for their participation.

BD is committed to delivering on our promise to serve our customers with the products and services they need.
