

PharmacyKeeper

Pharmacy Operations Software

Compounding today requires a degree of performance and flexibility

Do you have the right tools to succeed?

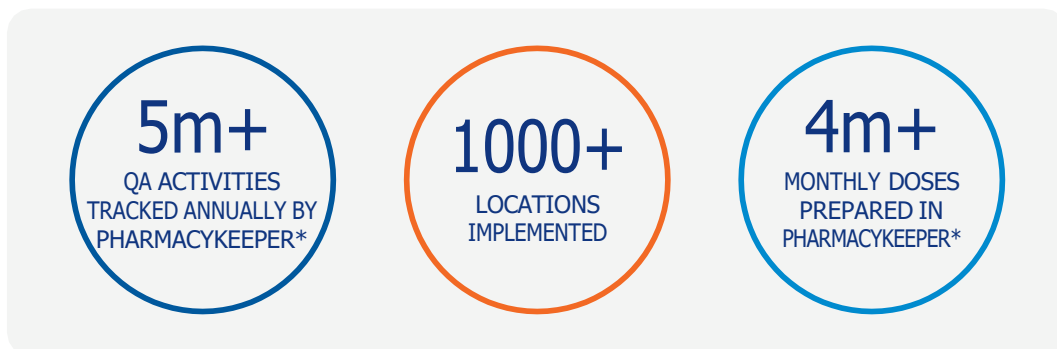

Meeting patient safety goals with CSPs preparation accuracy, managing staff and their safety, quickly adapting to compliance changes, and consistently finding ways to optimize pharmacy operation efficiencies – it's a challenging balancing act.

Adapting in an accurate and timely manner to the regulatory changes and evolving best practices in pharmacy standards requires a degree of **flexibility** and **efficiency** that is difficult to find among compounding technology.

PharmacyKeeper helps you and your staff, so you can focus on what matters most – your patients.

The **PharmacyKeeper** suite of software introduces flexibility to the management of IV compounding pharmacies.

"PharmacyKeeper has proven to be a reliable,
easy-to-use solution"
-2022 KLAS Report

FLEXIBLE AND PERSONALIZED SOFTWARE CAPABILITIES designed to help meet your current, and adapt to your future needs.

*Data on file

Where IV compounding safety, efficiency, and compliance meet flexibility

PharmacyKeeper is a suite of scalable and customizable web and mobile-based applications for compounding pharmacies by providing an additional level of safety over manual compounding methods, supporting activities to help meet and adjust to regulatory compliance requirements, supplying visibility to pharmacy operations efficiency metrics, and documenting training and activities completed by pharmacy staff.

- Flexible solutions designed to fit your workflow, with minimal changes
- Customizable, lightweight, cloud-based software
- Subscription-based model solution

VERIFICATION

Manage batch and patient specific IV compounding workflows configured for your unique needs with a cloud based system.

ACTIVITIES

Manage USP <797>/<800> cleanroom documentation and state board requirements.

TRAINING

Manage and oversee staff training and competency management.

INSPECTIONS

Generate and access to near real-time, mobile documentation of unit inspections.

TRACKING

Track turnaround times and other critical performance metrics.

DOCUMENTS

Create, manage, and store your facility's standard operating procedures, training materials, and reference guides.

System Components

Activities

- Schedule, track, and customize activities for any compounding area
- View compliance by location
- Access full audit trail generated by PharmacyKeeper
- Monitor and report high-level metrics
- Identify key areas of opportunity for efficiency improvements

Verification

- Guide and control compounding workflow
- Verify, review, and remotely approve barcoded items and recorded images
- View audit logs, analytics, and drill-down to data
- Manage master formula records
- Customize pre-built dashboards and workflows
- Receive EMR orders and send back use and waste data
- Choose from a variety of hardware options

Inspections

- Schedule, keep records, and receive alerts for inspections
- Increase auditability with compliance reporting and analytics

Tracking

- Gain insights into the medication delivery process with the analytics platform
- Provide pharmacy and nursing with near real-time visibility into medication orders with the medication tracking status board

Documents

- Access expert standard operating procedures for USP <795>, <797>, and <800>
- Store your facility's training guides and reference materials in a centralized location
- Enable remote access to the content you need

Training

- Manage staff's competencies
- Add your facility-specific training material
- Leverage PharmacyKeeper's library of training materials
- Schedule, administer, and track all trainings in one place
- Receive alerts and generate reports
- Automate course enrollment, grading, and approvals
